

Professional English Management

Test Your Professional English: Management is one in a series of ten useful Test Your Professional English books. It features 60 clear and simple tests for management students and professionals. The book is organized into 8 sections and covers over 500 key words and expressions in areas such as management styles, team-building, organizational culture, managing change, management control and systems management, and international management.

- 60 tests covering over 500 key words and expressions
- Wide variety of tests, including crosswords, cartoons, fill-the-gaps, and many more
- Tips on using English for work
- A-Z word list and full answer key
- Ideal for self-study and classroom use

To the student

Do you use English in your work or in your studies? Perhaps you are already working in management. Or maybe you are a student doing a management course or a business studies programme. Perhaps you are planning to study a management degree, even an MBA. If you need to improve your knowledge of management and management terms, this book will help you. You can check your knowledge of basic management concepts, key words and essential expressions so that you can communicate more effectively and confidently in your work and for your studies.

There are eight sections in the book. The first section is a basic introduction to management functions, terms and concepts. The remaining seven sections each cover a different area of management including leadership and organizational culture, managing change and the external environment. You can either work through the book from beginning to end or select chapters according to your interests and needs.

Many tests also have useful tips (advice) on language learning or further professional information. The tips offer important extra help, especially as they introduce some additional key language.

Many different kinds of tests are used, including sentence transformation, gap-filling, word families, multiple choice, crosswords and short reading texts. There is a key at the back of the book so that you can check your answers, and a word list to help you revise key vocabulary.

Your vocabulary is an essential resource for effective communication. The more words you know, the more meanings you can express. This book will help you develop your specialist vocabulary still further. Using the tests you can check what you know and also learn new concepts and new words in a clearly structured framework.

1 Job titles

Match the job title with the best definition on the right.

			3
1	Chief Executive Officer (CEO)	а	Manager responsible for buying.
2	Information Systems Director	b	Person who designs computer networks.
3	Purchasing Director	С	British English term for senior manager of a company.
4	Human Resources Director	: d :	Manager responsible for the process of creating goods or services for sale to customers.
5	Systems Analyst	е	American English term for the top manager of a company.
6	Managing Director	. f	Person responsible for setting up training opportunities for employees.
7	Marketing Director	g	The person responsible for computer operations in a company.
8	Production Director	h	Person responsible for managing product development, promotion, customer service, and selling.
9	Customer Service Manager	i	Person responsible for markets in other countries.
10	Staff Development Officer	ij.	Manager responsible for personnel issues.

Finance Director

Exports Manager

Customer Service Manager is a noun compound. The word manager is qualified by service and the word service is qualified by customer. Customer Service Manager means a manager of service(s) for customers. Noun compounds (also called compound nouns) are common in English. Look at the other examples above.

with customers.

Person responsible for relationships

Person responsible for presentation and control of profit and loss.

The role of managers

The table shows four main roles of managers: planning, organizing, leading and controlling. Below the table is a list of management functions. Write each function under the correct heading.

Planning	Organizing
taking on new staff	
	Controlling
Leading	Controlling

Management functions

comparing results with targets communicating with staff empowering staff to take decisions deciding strategy identifying needs managing resources identifying change motivation monitoring quality standards taking on new staffsetting objectives putting systems in place time management team-building supervision

Peters and Waterman (1982) say that planning, organizing, influencing and controlling are critical management functions that should be characterized by a bias for action.

Defining management

Here are some definitions of management and the role of managers. Complete the sentences with words from the box.

assembling controlling financial (x2) goals human (x2) information innovation (x2) leadership leading marketing material (x2) organization (x2) organizing planning (x2) process (x2) resources (x2) Managers are responsible for 'the process of p_____ o _____ the efforts of o _ _ _ _ members and of using all organizational r _ _ _ _ to achieve stated organizational g _ _ '. (Mescon, Albert and Khedourie, 1985, quoted in Hannagan, 1998, p.4) '(Management is) getting things done by other people'. (Mary Parker Follett, 1941, quoted in Hannagan, 1998, p.4) '(Management is) the process of optimizing h _ _ _ _ , m _ _ _ and f _ _ _ contributions for the achievement of organizational goals'. (Pearce and Robinson, 1989, quoted in Hannagan, 1998, p.4) A modern view of management, expressed by Sir Roland Smith, is that 'Management should be based on i _____, m _ _ _ _ and risk'. (quoted in Hannagan 1998, p.5) 'All managers may be involved with the operational aspects of management but as they are promoted and develop, their role becomes increasingly one of p _____, i ____, i _____ and I _ _ _ _ _ _'. (Hannagan, 1998, p.5) Management is 'the _____ of a ____ and using $r_{---}h_{--}$, f_{---} and m_{---} , and i_____ in a goal-directed manner to accomplish tasks in an o _ _ _ _ '. (Black and Porter, 2000, p.19)

Characteristics of managers

Match each term in the box with the pictures (1-12).

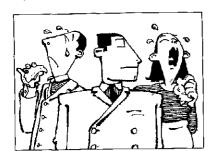

creative knowledgeable

emotionally strong

flexible leadership skills

social skills

good communicator mental skills technically skilled

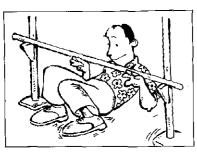

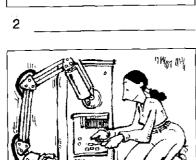

sensitive to others

emotionally strong

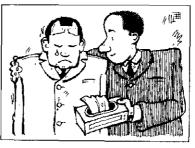

Adjectives are often formed with suffixes (endings) added to the root of a word. Look at the endings in the following adjectives from the list above: creative

flexible

knowledgeable

sensit**ive**

skilled

History of management theory

Below is a list of management theories over the last five hundred years. In each pair decide which statement is true.

- Machiavelli The Prince (1513)
 - (a) You have to be cleverer than your opponent, sometimes using force or trickery.
 - b) You have to kill your opponents.
- Marx and Engels The Communist Manifesto (1848)
 - a) The Communist Party will dominate the world.
 - b) The working class will rise up and take power from the bourgeoisie, creating a utopia of equality and brotherhood.
- Taylorism (1911)
 - a) A 'scientific' approach to management based on measuring time, performance and output and relating these to wages and salaries.
 - b) A system of management based on friendly co-operation between managers and workers.
- Hawthorne studies (1924-32)
 - a) Studies showing that factories produce more if workers are put under increased pressure.
 - b) Studies showing the relationships between management and workers are very important in getting the best performance.

Elton Mayo (1930s)

- a) The idea that social needs and relationships are very important factors in the workplace.
- b) The belief that workers should be able to control the work environment.
- Maslow's Hierarchy of Needs (1942)
 - a) The idea that people have needs which motivate their performance. Once a need is met, it is no longer motivating.
 - b) The idea that workers and managers have the same needs and have to co-operate.
- Systems approach (1950s and 60s)
 - a) Belief that organizations consist of many parts and management has to help each part to work both individually and as part of the whole organization.
 - b) Belief that a company is a single organization. Managing the single organization from the top brings success.
- Contingency theory (1980s and after)
 - a) Idea that organizations are all similar and have the same objective - profit.
 - b) Management must study every situation and design the best response.

6 Marketing

Marketing is in many ways the central activity in business management. In commercial organizations, marketing is 'everybody's business'.

A Complete the definitions of marketing using words from the box.

	70.775 1107 (3.11) (4.41)	gager a communica, se escape meso communicativa di	ent-religionalist III	Sign of the state	e lektrologia enginggi

- P
- A key concept in marketing is Unique Selling Proposition (USP), the special qualities of a product or service. These qualities make the product different from competitor products and give it special appeal to consumers. Marketers aim to create a USP in their products.
- See also: Test 39 SWOT analysis.

B The Four Ps of marketing are now the Seven Ps, because of the increasing importance of services and customer service. Fill in the spaces below to match the seven Ps to the best definition.

People	Phys	ical evidence	Place	Price
	Process	-Product	Promotion	

The traditional Four Ps are:

•	110000	provides.
2	P	Decisions about what customers pay for the product.
3	Р	Things concerned with location and distribution.
4	P	Ways to make the company and its products well known and ways to sell products.
And	here are three more:	
5	P	Everyone involved with the company and its products, especially the customers.
6	P	All the ways in which the company and its customers interact.
7	P	Anything that shows or mentions the name and image of the company and its products.

Management style

The table below contrasts two styles of behaviour, Culture A and Culture B. Study the table, then answer the True/False questions below.

Culture A	Managerial activity	Culture B
Plan for every situation. Develop plan with boss.	PLANNING	Accept surprises. Develop a plan, then ask boss to agree.
Create a department hierarchy. Communicate frequently face-to-face, rarely by e-mail.	ORGANIZING	Organize department into teams. Communicate infrequently face-to-face, often by e-mail.
Inform subordinates of decisions. Get involved in disputes between subordinates.	LEADING	Involve subordinates in decision-making. Allow subordinates to solve their own problems
Monitor activities, guide behaviour. Emphasize financial results in evaluating performance.	CONTROLLING	Evaluate then reward – based on results. Focus on customer satisfaction in evaluation.

(Adapted from Black and Porter, 2000, p.102)

1.	Culture A is more modern.	True False
2	Culture A is more flexible.	True/False
3	In Culture A, the manager is more 'hands on' and directive.	True/False
4	Hierarchical companies have a top-down way of working.	True/False
5	Subordinates help in decision-making in less traditional, modern companies.	True/False
6	If finance is the main factor in decision-making, staff are happy.	True/False

Modern management theory

Complete the text below with the correct headings from the box.

Corporate downsizing Empowerment Just In Time Learning organizations Outsourcing Re-engineering Teamworking Total Quality Management

Just-In-Time

This system was introduced from Japan in the 1980s. It means ordering components exactly when you need them, and supplying goods exactly when the customer needs them. It eliminates storage time and reduces costs.

Many large corporations and multinationals had grown too complex by the 1990s. Some sectors of the organization were less profitable. Many of these companies sold off or closed the underperforming sectors.

Management increasingly understands the value of sharing power with others throughout the organization. This leads to more participation in decision-making.

This is closely related to (3). By encouraging employees to work in very fluid teams, responsibility is shared. Employees and managers at all levels develop a better self-identity and work becomes more interesting. This system is seen as much more efficient than linear or hierarchical structures

This is a total revision and restructuring of an entire company. It involves asking fundamental questions about the objectives of the business and how it operates. It aims to create big improvements in cost, quality, service and product.

This management approach focuses on measuring the quality of service in all aspects. The idea is to develop systems that are more efficient and more economical, but which are also more able to meet the needs of customers.

This approach recognizes that companies cannot do everything. It can be better to use external suppliers for some specialist operations, or particular components in manufacturing. This decision can create quality improvements and cost savings.

Many companies have developed internal training programmes to help with staff development. This is an important investment in the workforce. It not only makes people better at their job, but it also makes them happier. It may also help companies to keep their best managers and staff.

A key management function described by Peters and Waterman (1982) involves going around looking, listening and thinking about what is going on. They call it Managing By Walking Around (MBWA).

Theory X and Theory Y

What do managers think of their staff? McGregor (1960) said there were two opposing views, Theory X and Theory Y.

Read the text below, then answer the True/False questions.

Theory X managers believe that people dislike work. Work is necessary because if you do not work you cannot live. People are naturally lazy. They prefer to be directed. So managers have to tell their subordinates what to do. Managers have to organize the workers and pressure them to do things. The manager's job is to think about the goals of the organization then make workers realize the goals. Subordinates want security. They want managers to organize and control everything. So Theory X managers are authoritarian. Managers are the bosses. They decide the goals and give orders. They direct everything, from the top down.

Theory Y is more or less opposite to Theory X. Theory Y managers believe that people like work. Work is necessary because people want to work to feel happy. People are naturally industrious. They prefer to participate in decision-making. Managers discuss with their subordinates what to do. Managers organize communication channels with the workers and listen to their opinions. The manager's job is to establish the goals of the organization with the workers, so that together they can realize the goals. Subordinates want managers to involve them, to delegate decision-making, to allow them autonomy. Theory Y managers are team-oriented. They trust their subordinates. The organization is less hierarchical and more creative.

Theory X and Theory Y are theories of leadership.

Theory X is a more traditional description of management/worker relations.

True/False

Theory Y is typical in hierarchical top-down organizations.

True/False

4	Workers do it.	True/False
5	Theory X managers are authoritarian.	True/False
6	Theory Y workers are lazy and don't want to work.	True/False
7	For Theory X workers, work is natural.	True/False
8	Theory Y working relationships are open, communicative and creative.	True/False
В	Put the words and phrases below into the correct column.	
:	-communication control co-operation creativity	v 1

orders

work is a necessity

participation

work is natural

security

Theory X	Theory Y
	communication

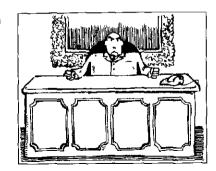

direction

traditional

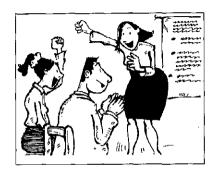

- Leadership is one aspect of management. Good managers often have some of the characteristics of good leaders.
- See also: Test 7 Management style

10 Leadership styles

Tick the three words or phrases that match each style of leadership.

- 1 Autocratic leadership open modern directive ✓ hierarchical ✓ creative traditional ✓
- 2 Democratic leadership group-oriented Communist team-based communicative simple charismatic
- 3 Laissez-faire leadership open non-existent co-operative creative strong modern
- 4 Charismatic leadership
 political personality-driven goal-oriented inspirational
 bureaucratic reward-based

Notice the terms group-oriented, team-based, personality-driven, goal-oriented, reward-based. These mean 'oriented towards the group', 'based on teams', 'driven by personality', 'oriented towards goals' and 'based on rewards'.

11 Team-building

Look at the diagram below. It shows that an effective team contains different people with different roles and different qualities. Study the diagram, then read the text that follows and fill in the spaces.

Balancing roles in an effective team

	Innovator Creative Inventive		Mentor Supportive role	
Competitive		Leader Motivating Summarizing		Co-operative
	Producer Task-oriented Goal-focused		Monitor Technically competent	Controller Reliable
				Co-ordinator

Team-building: getting the balance right

Another important role is the (5) _____, who works on all levels of co-ordination and organization of the team.

At the heart of the team is the (6) ______. His/her role is to make sure that all parts of the team work well together. He/she must motivate team members to achieve the agreed objectives. He/she is also responsible for summarizing and reporting the work of the team.

Team building in the workplace creates a sense of collective responsibility. Everyone shares in success, everyone learns from mistakes, everyone works together to help everyone else. The result is - in theory - more harmony, less competition; more support, less isolation; more job satisfaction and lower turnover of staff. The combined result is more success.

12 Conflict management

Conflict, like change, happens. There are different types of conflict in management contexts. Look at the table below and match the type of conflict (1-5) with the best definition (a-e).

Con	flict type	Defir	nition
1	Inter-group conflict	а	Personality or inter-personal differences within a group.
2	Intra-group conflict	b	Conflict between groups.
3	Relationship conflict	C	Disagreement on ideas or what to do.
4	Inertia	d	Conflict within a group.
5	Substantive conflict	, e	Failure to act or produce results.
В	Below are five possible solutions using words from the box. communication skills leader	me	onflict. Complete the phrases
1	Redefine goals or working	***	
2	Compare and evaluate		-
3	Appoint a		
4	Improve		
5			should intervene (or resign to
R	Notice the meaning of: Inter- intra- within So the Internet is a potwerk between	Tellinger Higher History History History	

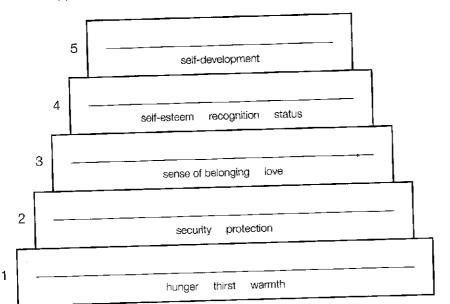

network within one organization.

13 Motivation

A Complete the three definitions of motivation with words from the box.

behaves drives effort outcomes reach willingness

- Motivation is what (1) ______ us to try to (2) _____ certain goals.
- Motivation is a decision-making process through which a person chooses desired (3) _____ and (4) ____ in ways that will lead to acquiring them.
- Motivation is the (5) ______ to make the (6) _____ to achieve certain goals.
 - An important theory of motivation in management is Maslow's Hierarchy of Needs. Maslow (1942) described five levels of need. Look at the pyramid below which shows these needs. Read the text on page 19 and write the names for each level (1–5) in the pyramid. Use the words in the box opposite.

Esteem needs Physiological needs Safety needs
Self-actualization Social needs

Maslow's theory suggests that people treat each level as a motivating factor, but once a level is achieved it is no longer motivating. Instead, the next level up becomes the new motivator. This tells us that in the workplace, esteem needs are important, but once achieved, they are no longer significant. Self-actualization, or self-development, is much more important. Managers therefore have to make sure that their staff continually feel that they are improving and achieving more in terms of self-actualization.

Maslow also states that it is not possible to move up a step without first fulfilling the lower needs.

Need is a verb. Need is also used as a singular noun, but most frequently it is used in the plural, needs.

Notice the prepositions in these phrases: the need for (something), in need of (something), the needs of (someone).

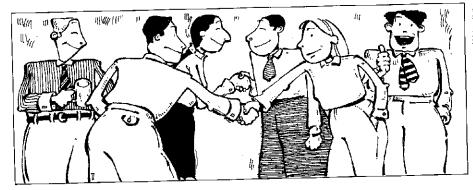

Notice also the noun phrases customer needs, financial needs, research needs, training needs.

14 Negotiating styles

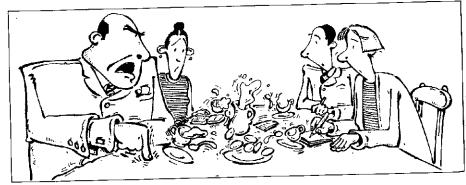

The text opposite describes three negotiating styles. Read it and then complete the table that follows.

Principled negotiation (win/win)

Creative negotiation

Adversarial negotiation (win/lose)

Most people negotiate to gain some advantage to themselves or to their side. The fighter is only interested in his side winning and the other side losing. This is a hard style of negotiation and involves making demands.

In business, it is often better to negotiate to independent advantage. This means each side thinks about its advantages, but knows that the result will bring either common benefits or different advantages to each side. Both sides get something and are happy with the result. In this type of negotiation everyone makes concessions. This is sometimes called a win/win negotiation. Another style of negotiation is seen in the creative negotiator. Here both sides look for agreement. Agreement is the main objective and one or both negotiators have a soft negotiating style.

Negotiation styles: a continuum

Adversarial negotiation	Principled negotiation	Creative negotiation
Negotiate to (1) win	Look for (2) benefits	Look for (3)
Make (4)	Make (5)	Accept what is on offer
(6) F	Negotiator for independent and mutual advantages	(7) C negotiator
(8)	Win/win	Agree

See also: Test 37 Resistance to change

SECTION 2

15 Project management

The following are typical stages in project management. Key words have been scrambled. Unscramble them.

1 -	Set jobsevteic -	<u>objectives</u>
2	Establish sonnifitide	
3	Appoint project reelad and smeat	
4	Estimate stocs and provide a dubteg	
5	Put work out to <u>redent</u>	
6	Discuss sopalrops	
7	atetongie with tendering companies	
8	Sign tontscrac	
9	nalp and ledushec the work	
10	Provide necessary <u>trupsop</u>	
11	romiton the work in progress	
12	Evaluate <u>lessrut</u>	

Match each of the words you have unscrambled with a word or phrase below that has a similar meaning.

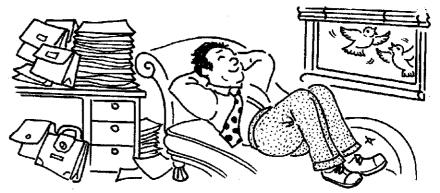

For example: 1 objectives 1 aims

a	discuss	if "	offers	k	assistance
b	terms	g	submissions) : ·	aims
C	organize	h	check	m	outcomes
d	co-ordinator	i	groups	n	expenses
e	set time targets	j	agreements	o	financial plan

16 Time management

Good time management is very important in an efficient workplace. Most people could improve their time management skills. Match an action (1-5) with its meaning (A-E) and an example (v-z).

Action		Meai	ning	Example		
1	plan	Α	improve your abilities	V	A colleague asks you to go to a meeting – but it is not absolutely necessary. You make an excuse and do not go.	
2	delegate	В	organize	W	You write appointments, deadlines and actions in your diary. You know what you have to do for the week.	
3	upgrade skills	С	order things according to importance	X	A new project has to be carried out. You do not have time to run it. You ask someone else to do it.	
4	prioritize	D	say no	У	You decide that writing a report for your boss is the most important job today. Do that, then do something else that is urgent, but less important.	
5	turn down requests	E	get somebody else to do something	z	You sign up for an in-service training seminar on Time Management.	

How is your time management? Here are eight tips on time management: keep a diary; write weekly (or daily) To Do lists; prioritize; set objectives; make deadlines; act or delegate; build in relaxation time; and get enough sleep!

1 / Defining organizatonal culture

Every organization, every business, has its particular culture. Organizational culture combines aspects of an organization with its particular culture. Label each of the following as part of 'organization' (O) or as part of 'culture' (C).

1	values	_
2	Having a clear structure	
3	Beliefs	
4	Formal sources of authority	
5	Assumptions and attitudes	
6	Norms	
7	Objectives/Common purpose	
8	Relationship between centre and periphery	
9	Shared experience	
10	The system	
В		
A:	How is organizational <u>culture</u> created? Wha	at is it?
В:	Organizational culture is a set of basic a people think, in a company or organization.	, or what
A:	So it's based on common v?	
В:	That's right. Everyone learns these over time. T doing things, the $n_{}$	hey learn the way of
A:	And everyone agrees that they are right?	
B:	Generally, yes.	
A:	And where do they come from?	
В:	From shared experience. From history, tradition common b	•
A:	And new employees usually learn the same thi	ngs? They learn the
	S ·	
ъ	Exactly Everyone learns the same organization	iai cuiture.

18 Characteristics of organizational culture

Company A and Company B have broadly opposite organizational cultures. For characteristics 1-6, fill in the spaces with a word which contrasts with the underlined word in the opposite column. For 7-10, complete the phrase so that it contrasts with the idea in the opposite column.

om	pany A	Company B
1	A <u>modern</u> manufacturing company.	A <u>traditional</u> manufacturing company.
2	A f company structure.	A <u>hierarchical</u> company structure.
3	An <u>open</u> company with fluid communication channels.	A c company with clearly defined communication channels.
4	There are i meetings to decide policy.	There are <u>formal</u> meetings to explain policy.
5	There are general guidelines for employees to follow.	There are a lot of r and r for employees to follow.
6	The business is mdriven.	The business is <u>product</u> -driven.
7	Communication channels work in all directions, including sideways.	Communication channels are td .
3	Work is organized through a f system of teams, with a lot of exchange between teams.	Work is organized through a rigid system of d, with little exchange between them.
€	C, and innovative and dynamic work are highly valued.	Productivity and financial success are highly valued.
0	People are valued above	Systems are valued above

19 Developing organizational culture

Complete the sentences below (1-8) with a word from the word square. The words are all connected with things a company may use to develop its organizational culture.

R	l	М	K	S	Y	М	В	0	L	S
С	Α	L	Α	N	G	U	Α	G	Ш	Z
С	Ε	R	E	М	0	N	١	Е	S

V	R	E	М	R	A	W	Α	R	D	S

- Many companies supply <u>uniforms</u> for their employees which make them instantly recognizable and establish the idea of a team.
- Many organizations and sectors of employment have a particular 1____ with special words, special jargon unknown outside the business.

- Many organizations have a special regular m _ _ _ _ full of news and comment on the activities of the organization. Some organizations, especially those in leisure, sports and
- entertainment, use s _ _ _ _ to promote a particular image.
- The history of many companies, and their boardrooms, are illustrated with pictures of company or organizational h _____.
- Special prizes and a _ _ _ _ presented at special c _ _ _ _ help to build up the image of a company.
- While fairy stories are not usually part of company history, there are s _ _ _ _ and sometimes m _ _ _ that become part of the organizational heritage.
- Logos, letterheads, the painting on vehicles and on buildings, and all signs and s $_$ $_$ $_$ are a significant contribution to the culture of an organization.

Hofstede identified four

20 Four dimensions of culture

Hofstede (1980) wrote about culture as 'collective programming' which affects behaviour. Here is a brief summary of Hofstede's work as applied to organizations. Complete the spaces using words from the box.

competitiveness -dimensions collective assertiveness individualism masculinity masculine environment femininity uncertainty avoidance subordinates threat power distance

What's your culture like?

measure of how much the

(1) dimensions of culture.	organization has an individualist
These are power distance,	or a (7) c ethic.

(5) t·	(13) e are seen
(6) I is a	as feminine characteristics.

Cultural variance

Trompenaars (1993) describes seven aspects of culture that affect behaviour. Below are five of these aspects which contain contrasting features, e.g. universal and particular, individual and collective, etc. Match each feature (1-10) with the correct meaning (a-j).

Aspe	ects of culture	Mear	ing
1	Universal	a	Business relationships are limited and contractual.
2	Particular	b	Status, age, gender or education matter more than particular successes.
3	Individual	C	Relationships are fluid and flexible depending on situation.
4	Collective	d	Society is based on the whole community.
5	Neutral	е	People are reserved and do not easily express feelings.
6	Emotional	f	Recent or past successes are highly valued.
7	Diffuse	ġ	The whole person is engaged in the business relationship and it takes time to build the relationship.
8	Specific	'n	Society is oriented towards individuals' wants and needs.
9	Achievement-based	i	Relatively rigid rule-based behaviour.
10	Ascription-based	ij	It is common to express feelings openly.
Ç	Time: history a	and pas al to cre	Trompenaars describes are: st experience, or current activities and sate the future shich individuals affect the world they live

in, or how much the world affects individuals

See also: Test 59 Cultural issues

22 Power and politics

'A person can have power over you only if he or she controls something you desire.'

(Robbins, 1996, p.463)

- A Match the term on the left (1-6) with the best definition (a-f).
- 1 Referent power -
- a Power that is based on fear.
- 2 Coercive power
- b The ability to make others do as you wish, because you control resources, e.g. favours, promotion or salary resources.
- 3 Reward power
- c The capacity that A has to influence B to do things he or she would not otherwise do.
- 4 Legitimate power
- d Power based on knowledge or special abilities.

5 Power

- e Influence that a person has because of special personality traits or desirable resources.
- 6 Expert power
- f Power that is based on status or position in an organization.

wo	words from the box.			
CX	mpromise control groups influence looking lose organizational status			
Student:	What are (1) <u>organizational</u> politics?			
Tutor:	They're the process by which individuals and (2) try to increase their (3) inside an organization.			
Student:	So being political can help you to have some (4) over aspects of your work?			
Tutor:	Exactly.			
Student:	What if you don't know the politics inside an organization?			
Tutor:	If you don't, you can (5) power.			
Student:				
Tutor:	Perhaps. In fact, a lot of the time you have to (7) But essentially the game is to raise your (8) within the organization.			

SECTION 3 23 How political are you?

Many political issues can affect the working environment. Match the issues (1-9) with the examples (a-i).

Issue

- Gender politics -
- Equal opportunities
- **Ethics**
- Peer competition
- Relationship-building
- Making alliances
- **Exploiting** weakness
- Criticizing colleagues
- Giving friendly advice

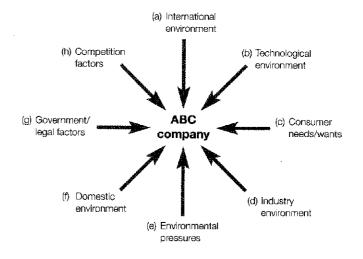

Example

- a Saving a colleague has done a bad job, or made a mistake.
- b Taking the opportunity to increase your power and influence because of someone else's weak position.
- Treating everyone fairly, without considering their race, gender, beliefs, etc.
- Helping a colleague to do their job better.
- Rivalry between colleagues for power, influence, opportunities and rewards.
- Creating shared attitudes and common views among a team.
- Giving a woman a job because you need more women in that department.
- Creating common views with particular colleagues who have power and influence.
- Making decisions about moral issues, such as the interests of the whole community.

Three of the above might not be acceptable in some contexts: saying a colleague has done a bad job, taking the opportunity to increase your power and influence because of someone else's weakness, and giving a woman a job because you need more women in a particular department.

24 The external environment

Businesses and organizations have to adapt and respond to pressures from the external environment. The diagram shows eight kinds of pressure that impact on businesses. Match each one to an example (1-8) below

- Other businesses offer similar or better products or services. _h
- Globalization offers opportunities to export more goods or services.
- 3 The target market changes because of demographic factors.
- New laws affect product design.
- Products become out-of-date due to new inventions.
- Production costs increase because of difficulties in getting raw materials from ecologically sensitive areas, e.g. rain forests.
- Changes in fashions among target markets.
- The product is new and specialized and the market is growing.

Word stress sometimes changes from the noun to the adjective. Look at the following:

technology. industry

technological industrial

competition competitive environment environmental

25 The industry environment

This test looks at one of the eight external factors mentioned in Test 24. The *industry environment* means the industry in which a company works and all the factors which affect competition in that sector.

A	Mark the following statements as True or False.	
1	In an industrial sector with a low profit environment it is impossible for a company to make large profits.	True False
2	In an industrial sector with a high profit environment there is usually a lot of competition.	True/False
3	Substitutes are possible alternatives that customers can choose.	True/False
4	An environment with fragmented customers means that the customers cannot act together to make producers lower their prices.	True/False
5	Highly technical products with high start-up costs make it difficult for new producers to enter the market.	True/False
6	High quality and low price normally go together.	True/False
7	If there are many suppliers of a product, then the suppliers are in a weak position. If there are few, high profits are easier to obtain.	True/False

B The chart below shows the possible contrast between a high profit environment and a low profit environment. Complete the missing words. Note: The information in part A will help you to do this.

The industry environment and profit

Higher profits	Lower profits
• Q based	• Price-based competition
competition	• Many c
• Few competitors	• Easy market to enter
• Difficult m to enter	• Many new players in the market
• Few new players in the market	• Many s
• Few substitutes	• Few customers
• Many c	• Few s
 Many suppliers 	• United customers
• F customers	

Don't confuse the *industry environment* with the phrase *industrial marketing*. *Industrial marketing* means promoting and selling goods and services to organizations and industries; not primarily to consumers. *Industrial marketing* contrast with *consumer marketing*, where businesses market their goods mainly to private individuals.

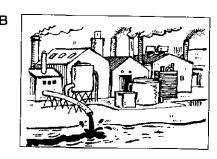

26 Ethical issues 1

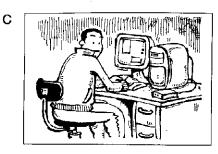

Match the ethical issue (1-10) with an example (a-j) and a picture (A-J) that illustrates the issue.

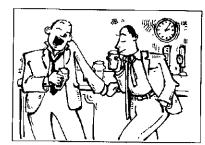

1 gH

Example Ethical issue Agreeing to set high prices 1 Workers' rights with a competitor. Not giving a job to someone Animal rights because they are of a different ethnic origin. Marketing a dangerous Corruption product. Secretly giving money to a Computer data protection business partner to get a favour from him/her. Putting dangerous chemicals Codes of conduct into a river. Testing products on rabbits. Company 'perks' Making staff work very long Consumer safety hours. Stealing secrets from a Discrimination computer network. Giving some employees Environmental protection special benefits. Getting drunk at lunchtime. Operating a cartel

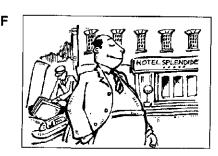

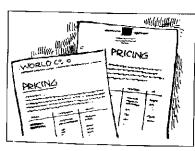

G

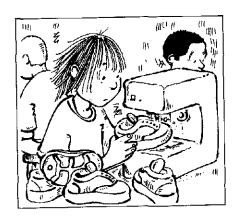

27 Standards

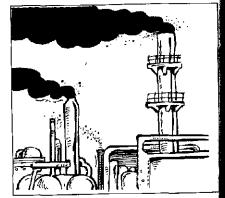

Companies and organizations need to meet certain minimum standards of behaviour. There are at least four categories of standards. These include standards of behaviour: towards customers and consumers (CC); towards the law (L); towards employees (E); towards the environment (ENV).

Look at the pictures below.

- A Identify the category. Some are concerned with more than one category.
- B Label each picture by unscrambling the words.

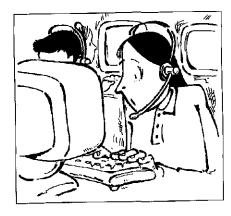

hicld rabuol __child labour

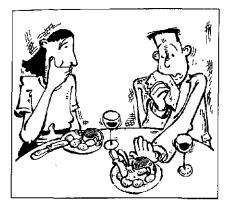

rai loptuloni _____

PINSURANCE

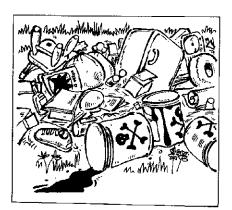

konwirg donticoins _____

rafud _____

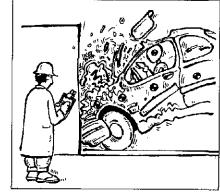

dofo dastarnds _____

lois natoncimaniot _____

libilriatey _____

tefsya dasdranst _____

28 Looking after people: Health and Safety

Companies and organizations have a legal and moral responsibility to look after their employees and their customers. Health and Safety regulations protect employees. Consumer Protection laws protect consumers.

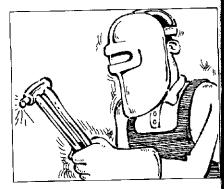

Label the pictures below with words from the box.

air-conditioning protective clothing safety mask for a welder

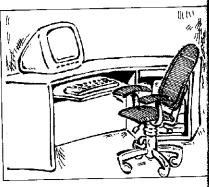

product testing ergonomics safety cap on a cleaning agent warning notice on a paint tin vivisection

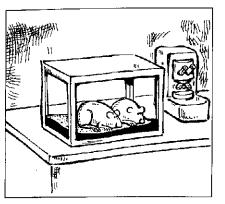

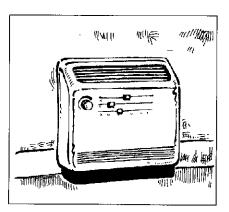

product testing

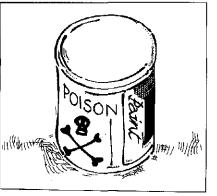

Now label each of the above 'H&S' (health and safety provisions for staff), or 'CP' (consumer protection).

A noun compound consists of two nouns, e.g. safety mask, paint tin, product testing). These phrases typically mean the same as:

a mask for safety

a tin for paint

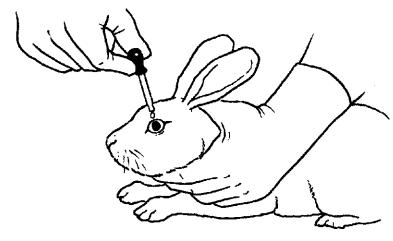

testing of products

Normally the first noun in the noun compound is in the singular, i.e. product testing not products testing.

29 Ethical issues 2

Below is a list of issues which may or may not create ethical dilemmas for a company or organization. Unscramble the underlined words.

1	Cigarette gadvisterin.	advertising
2	puslime displays of sweets.	
3	Animal tintseg of pharmaceutical products.	
4	seviticoniv for cosmetics, soaps and shampoo products.	
5	<u>elswith</u> -blowing to expose corruption in your organization.	
6	Having no equal <u>popsiteteruin</u> policy in employment.	
7	Changing jobs and taking <u>fecdatilinon</u> information on suppliers to your new job.	
8	Presenting figts to a possible buyer.	
9	Offering corporate <u>toyasphilit</u> to employees and their partners.	
10	itronmoop of sweet drinks to children.	

Testing products on animals is an ethical issue.

30 The legislative environment

Companies and organizations operate in a legal environment. Below are ten areas of legislation. Match each legislative area (1–10) with the correct description (a –j).

Legis	lative area	What	is it about?
1	Environmental legislation	a	Minimum standards in quality, service and rights of customers.
2	Social legislation	:b	Restrictions on use, movement and sale of items that present serious risk.
3	Consumer protection	∖ c	Protection of air, water and land.
4	Dangerous goods security legislation	đ	Issues concerning state such as defence interests, nuclear resources, etc.
5	Tariffs, duties and taxes	e ·	Employment law, hours of work, holidays, insurance, etc.
6	Official secrets, state security legislation	f	Restrictions on ways of promoting goods and services.
7 ; ;	Sale of goods legislation	g	Compulsory levies applied by government.
8	Company law	ĥ	Rights for all groups in society to be treated fairly.
9	Advertising standards	Í	The quality of goods and services and the accuracy of any claims made for products and services offered for sale.
10	Equal opportunities law	j	Obligations to publish accounts, names of directors, etc.

The noun goods is only used in the plural and takes a plural verb, e.g. The goods remain our property until payment is received in full.

Other common plural noun forms are:

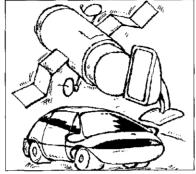

premises (buildings), assets (financial), contents, funds, savings

The singular form of these nouns has a different meaning from the plural form.

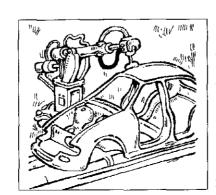

31 Forces for change

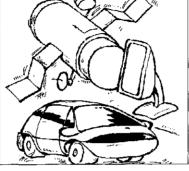

What are some of the most important forces for change? Match the pictures (1-10) with the forces for change (a-i).

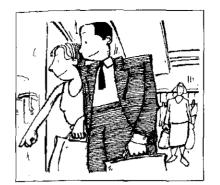

- legislative change
- consumer needs and wants
- demographic change
- public opinion
- changing leisure habits

- f technological change
- competition
- h automation
- environmental/ecological factors
- changes in financial environment

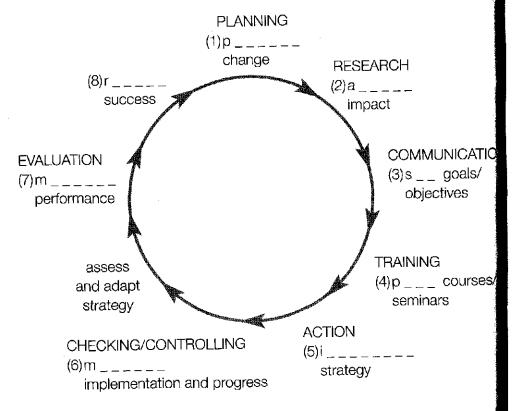

The **environment** means the world in which we live and work. The term is often used in connection with ecological concerns. We can describe a more specific environment by adding a qualifier, e.g. the business environment, the competitive environment, the local environment, the political environment, the economic environment.

The word 'environment' is usually used in the singular, but notice the phrase in different environments.

Change happens. Managing change is about dealing with this reality.

Complete the words in the diagram with words that mean the same – or almost the same – as the words or phrases in the box.

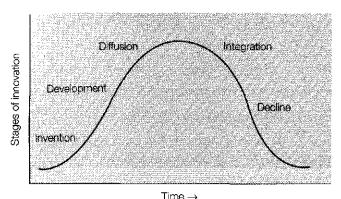

1 say that something will happen 2 calculate 3 fix 4 design 5 carry out 6 check 7 evaluate 8 give a prize

33 Innovation

Look at the graph, which shows five stages of innovation. Complete the description below with words from the box.

Five stages of innovation

(Black and Porter, 2000, p.112)

decline development diffusion invention inventor market patent range

There are typically five stages of (1) <u>innovation</u>. First there is (2) i_____, which means thinking of a new product or new idea. During this period, the (3) i____ should (4) p____ the idea. Then the second phase is (5) d____, where the idea is adapted to the needs of a specific (6) m____. Then comes the (7) d_____ stage, where the idea is sold and used by consumers. Next the company fully accepts the innovation and it becomes a full part of the business's product (8) r_____. This phase is called (9) i_____. The final phase is called (10) d____. Perhaps technology moves on or consumer demand changes and the idea or product is no longer needed.

Compare the five stages of innovation with a classic **product life cycle**. It is very similar. The product life cycle is often described in terms of development, launch, growth, maturity, saturation, and decline.

34 Training

Training is a key aspect of dealing with change. Answer the questions below with words or phrases from the box.

curriculum vitae (CV) graduate human resources in-service training lecture qualification research retraining seminar skills audit staff development trainee trainer training budget training manager

- What is the name of the person responsible for training in a company or organization? <u>training manager</u>
- 2 What is a possible alternative to making an employee redundant?
- What do you call a special award that is given after a training course?
- 4 What is the word to describe someone with a university degree?
- What is the document that lists a person's work and educational experience?
- 6 What is the term for a special study to find out something?
- What is the name of a process to find out the level of competence needed for certain activities, or the existing competence of staff?
- 8 What is the term used for the money available to spend on training?

hat is the term for making training available to staff?
hat is the name for a single talk given by an expert to a training oup?
hat do you call someone who trains staff?
hat do you call someone who is being trained?
1

Which department is usually responsible for training?

The -ing form of the verb is called the gerund when it stands in place of a noun: training. Gerunds are common: engineering, teamworking, downsizing, outsourcing, data processing, marketing, etc.

35 Organizational change

'Adapt or die'. This is a common saying in business. Businesses and organizations must respond to change. Match the terms (1-8) with the correct definitions (a-h).

- Organizational development
- An approach to change that is based on looking at people and their relationships to the whole. The approach is planned, strategic and long-term.
- 2 Change agents
- A concept of organizational change that is based on flexibility and continuous change.
- 3 Bench-marking
- A combination of forces that do not want change.
- 4 Communication
- d Study of the impact of change.
- 5 Resistance to change
- e Radical redesign of all aspects of an organization's activities.
- 6 Re-engineering
- Explaining why change is necessary and how it should happen.
- 7 Data analysis
- A process of identifying a model of 'best practice' and comparing performance against this model.
- 8 Organizational renewal
- h People responsible for making change happen in organizations.

The prefix re- means 'to do something again'. Here are some words with the prefix that we have seen in this book:

- re-engineering
- retraining
- redesign
- redefine

re is used with a hyphen (re-) before 'e', e.g. re-engineering. We also use a hyphen if there is a similar word, in order to show the difference, e.g. to re-form (to form again) compared with to reform (to change).

36 Change and communication

A When managers have to introduce change, good communication is very important. There are many ways to communicate in businesses and organizations. Look at the definitions (1–8) and match them with ways to communicate in the box below. Do not use all the words in the box.

company reports departmental meeting discussion e-mail extranet fax formal presentations internal mail Internet intranet memos newsletters notice-board post quality circles teleconferencing telephone video-tape voice-mail

1	Conversation about a particular topic.	discussion
2	A method of using computer and TV monit meeting in real-time, but when the particip places.	
3	Occasional meetings between colleagues to performance can be improved.	talk about how
4	A form of telephone answering system.	~
5	Paper correspondence between employees in organization.	n the same
6	Traditional letter correspondence.	
7	A private network accessible from PCs and of the same organization or group. Users camessages posted on a website.	• •
8	A private network restricted to members of and authorized outsiders. Users can read and posted on a website	_

3/ Resistance to change

Change is often met with resistance. Change agents therefore have to negotiate with those who would prefer to resist the changes. Complete the headings for the five stages of negotiation with words from the box.

agreement	conces	sions or compror	nise information
persuasion	planning	preparation	relationship building
	,		iolation ip ballaning

Stage I	
Planning	and
	gs, the foundations have to be ready. Collect
information. Decide on a	strategy. Set objectives.
Stage II	
	between negotiating parties
This stage is about develo	ping trust between the parties.
Stage III	
	exchange
Learn about the needs and	d demands of the other side.
Stage IV	
	attempts
Attempts to modify the po	osition of the other side. Negotiation is about
increasing the influence o	f your side.
Stage V	
	and
In this stage both sides ma	ake changes in their original position. If this
happens, both sides leave	the negotiation with some satisfaction.

- Note the verb phrases to make a concession to make concessions to agree/make a compromise to make compromises
- to compromise See also: Test 14 Negotiating styles

Complete the table below with all the words from the box on page 51.

Machine Written/printed Speech communication communication communication memos

The virtual office has become a reality. Working from home, using networked computers and electronic data transfer (EDT), is now an alternative to the traditional office. Mobile communications, including cell phones that can send and receive e-mail messages, and laptop computers, mean you can have a portable office. Video-conferencing capabilities are improving all the time. Electronic funds transfer (EFT) and home-shopping using the Internet are everyday tools.

38 Planning

All the words in the box concern planning. Match each term with the correct definition (1–12). The answers include the word *plan* eight times.

interir	action	budge objectives	-	business erational	contingency planning provisional
		-str	ategic	tactic	al
					en la company de

erritoria	The second control of
. ¶	A plan that focuses on the whole organization, internal and external factors, and actions necessary to reach long-term goals. strategic plan
2	A process that focuses on the future of an organization and how to reach certain targets.
 :3	The results or targets that management thinks are desirable.
4	A plan for a specific part of the wider organization, usually narrower in scope and over a shorter time period.
5 <u>.</u>	A specific short-term plan to realize a narrow single objective.
6	A short-term and temporary plan.
7	A trial plan, that may or may not be adopted permanently.
8	A plan which explains a new commercial activity or new company and how to start it.
9	A plan of what to do, often indicating individual responsibilities often short-term.
10	A plan which sets out the forecast costs of a project or activity.

A reserve plan which will only be used if necessary.

39 SWOT analysis

A classic way to create a marketing strategy is to begin by looking at a company's Strengths, Weaknesses, Opportunities and Threats. Expo Marketing Consultants carried out a SWOT analysis of GUBU Toys Ltd. Put all their findings in the correct box to complete the SWOT analysis.

- 1 Reliable and committed workforce
- 2 Use of wood seen as 'good for the environment'
- 3 High labour costs
- 4 Location far from population centres/far from new markets
- 5 Beautiful handmade toys
- 6 Poor communications systems / limited technological skills
- 7 Internet as potential marketing tool / e-commerce
- 8 Lack of IT training in staff
- 9 Declining interest in domestic markets for traditional toys
- 10 Potentially strong demand in Germany and Scandinavia
- 11 Competition in Germany and Scandinavia / Baltic countries
- 12 Increased competition from mail order companies
- 13 Selling by new channels, e.g. mail order

Expo Marketing Consultants SWOT Analysis for GUBU (Toys) Ltd		
Strengths 1	Weaknesses	
Opportunities	Threats	

- Strengths and Weaknesses are concerned with things inside the company which it can directly control. Opportunities and Threats are outside factors.
- See also: Test 6 Marketing

Read the text below on preparing a business plan. Then look at the Contents page from the Business Plan of Gorliz & Zimmerman, an office furniture manufacturer. Complete the missing words.

Preparing a Business Plan

The business plan is an important document with two essential functions. It aims to convince possible investors and other stakeholders of the potential of a new business. It also works as a guide for the company in its first year or two of operation.

The business plan normally starts with a title page and outline of the new business. It includes the name, logo and mission statement of the activity. There are normally three main parts to the business plan.

First, the Marketing Plan. This includes a description of the products and services, an analysis of the market, a survey of the competition and a basic outline of promotion and selling strategies.

The next part is the Financial Plan, which includes details of startup costs, a profit and loss forecast for the first year or two (or maybe three) and then a calculation of the break-even point. This is to show when the business expects to begin making a profit.

Then there is usually a People and Action Plan. This explains who is involved, and states their roles and responsibilities, their experience and abilities. The Action Plan explains what will happen in the important first year of the business, i.e. during the start-up phase.

Finally, the business plan has some information on the location, perhaps with photographs and architect's drawings. At the end there are the Appendices, containing any additional and detailed information or support material.

Gorliz & Zimmerman: Business Plan April 6 2001

Contents

1.	Introduction: Business Outline
2.	M plan
2.1	P and s
2.2	M
2.3	P and s
2.4	C
3.	F plan
3.1	S costs
3.2	$P_{}$ and $l_{}$ $f_{}$
3.3	B point
4. P _	and A plan
5. L _	
C A	

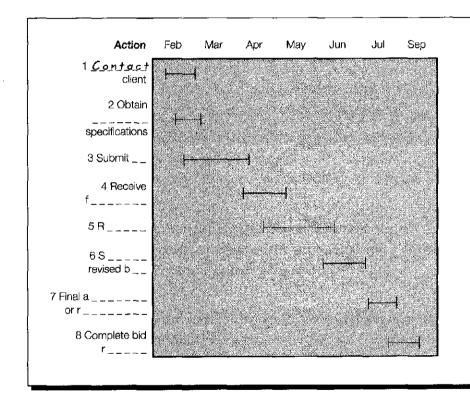

New businesses usually have a **business plan**. This is a document that describes what the new business is, how it will start up and how it will sell its goods and services. It also contains financial information.

There are different ways to structure a business plan. Some are shorter and simpler than the above model. Others are much more complicated.

41 Sequencing and timing: a Gantt chart

A key aspect of planning is sequencing and timing. A common management tool for this is the Gantt chart. Complete the missing words in the Actions using a word that means the same as the terms below (in the same order).

- 1 speak to or write to
- 2 written legal agreement
- 3 offer or tender
- 4 comments or suggestions
- 5 alter the (3)
- 6 send (3) (to the client)
- 7 acceptance; non-acceptance
- 8 re-examination

P

Henry L. Gantt (1861-1919) was an American management consultant.

42 Management By Objectives (MBO)

Management By Objectives (MBO) was originally developed by Peter Drucker (1985). Look at the diagram below and complete the dialogue underneath.

Staff	Oxdanizational	Jointly set joels/Common dwnership Set time period	→ Performance →	Periodic teview and evaluation	Feedback
-------	----------------	--	-----------------	--------------------------------------	----------

John:	What is Management By Objectives?
Jane:	MBO is a (1) <u>management</u> approach. It is designed to help realize the (2) of an organization.
John:	The targets?
Jane:	Yes.
John:	So, how does MBO work?
Jane:	The first thing is to have an organizational (3) This is the method to reach the goals. But it is very important that (4) and (5) work together to create the goals.
John:	So everyone owns the goals?
Jane:	Exactly. Everyone's (6) is vital. So the goals are agreed, as is the time period in which those goals should be achieved. Then the plan is put into action. This is (7) At this point, there is regular (8) and (9), a typical management task. But again, in MBO, everyone is involved. So everyone provides (10)

- Management By Objectives (MBO) is about setting targets and measuring results against the targets.
- See also: Test 51 The control process

Total Quality Management (TQM)

TQM is a management philosophy in which quality is an absolute priority. Read the statements below. Fill in the spaces with a word that means the same as the word or phrase in italics below.

- long-term policy objectives
 Successful TQM gives businesses a c ______
 a ______
 better prospects than other businesses in the same market

organization.

1	improvements in quality.
	numerical information from research
8	TQM includes customers and s in setting quality objectives.
	companies who sell parts or components, or services, to other companies
9	TQM recommends improvement of employees' s through t
	abilities and competence / courses
10	TQM requires good p and
	c in t at all levels of the organization. involvement / working together / groups

'I got laid off because I guess I made poor quality cars. In sixteen years not once was I ever asked how to do my job better. Not once.'

Redundant car worker (Drucker P., 1968, quoted in Hannagan, 1998, p.185).

Naturally, many 'management gurus' have written about the importance of quality. Peters and Waterman (1982) are two of the most important. See also Philip Crosby (1979) who emphasized the role of people responsible for quality improvement.

Here are two definitions of **Total Quality Management**:

'An intensive, long-term effort to transform all parts of an organization in order to produce the best product and service possible to meet customer needs' (Hannagan, 1998, p.174).

'An approach to control that integrates quality objectives into all management functions to continually achieve higher quality' (Black and Porter, 2000, p.498).

44 Corporate strategy

Corporate strategy is described below as a combination of eight aspects. Read the questions on the left and choose the correct answer from the box.

action plan analysis of resources corporate objectives environment market research mission statement

audit of external marketing plan strategic plan

1	What is our business?	mission statement
2	Where do we want to go?	
3	Who are our customers? What do they need?	
4	What threats and opportunities are there?	
5	What are our strengths and weaknesses?	
6	How do we achieve our goals in terms of marketing?	
7	How do we get to where we want to be, with our present resources?	
8	What do we have to do now?	

P

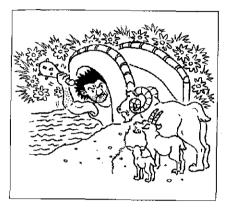

The corporate strategy of an organization combines:

- · a statement of the core functions of the business
- its aims and goals
- how to achieve its aims and goals

Corporate strategy is both an overview of where the organization is now and a description of what is necessary to take it forward.

45 Strategic management

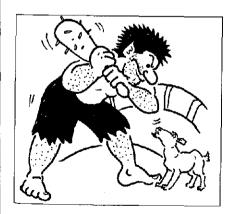

Strategic management is how a business tries to achieve its goals, using any available resources. The Billy Goats Gruff is a Norwegian fairystory about three goats who fight for their freedom against a monster – and win.

Big Billy Goat Gruff: 'We are here and we want to go there. We need a strategic plan.'

- First ... then ... then ... finally ...

- I'm going to eat you up.
- No! My brother is coming soon and he's bigger than me.
- Okay! You can go!

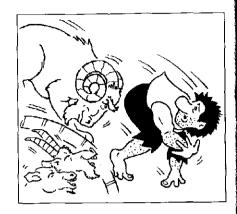

- I'm going to eat you up.
- No! My brother is coming soon and he's bigger than me.
- Okay! You can go!

performing

very badly

True/False

- I'm going to eat you up.
- Oh, no you're not!

- Aaagh!
- Success!

Mark the following statements True or False.

Strategic management is a process, not a single event.

- 2 Strategic management involves top managers and not subordinates.
- True/False
- 3 Good strategic management monitors results and makes changes.
- True/False
- Strategic management is concerned with actual resources, not future resources.
- True/False
- 5 Strategic management uses tools like the 'product life cycle' to plan future actions.
- True/False
- 6 Bill Gates is a good example of an effective strategic manager.
- True/False
- 7 Strategic management is the same as having a strategic plan.
- True/False
- 3 Corporate strategy and strategic management are the same thing.
- True/False

46 Portfolio analysis

Portfolio analysis was originally created by the Boston Consulting Group (BCG). It uses the Boston Matrix, a management tool to help companies make maximum profit from their complete range of products or services.

meture phase of

Mark the following statements as True or False.

1	The Boston Matrix is a strategic planning tool.	True/False
2	Managers can compare the finances of Strategic Business Units (SBUs) inside one company.	True/False
3	An SBU is a cash cow.	True/False
4	Dogs often become stars and make a lot of money.	True/False
5	Cash cows require a lot of investment.	True/False
6	Stars have low market share but a lot of potential.	True/False
7	Question marks may become dogs or stars.	True/False
8	Cash cows may become dogs.	True/False
9	The Boeing 747 is the cash cow of the Boeing Corporation.	True/False
10	An example of cash cows that became dogs is	

4/ Management organization

A Management of a large company is often hierarchical. Here is a typical model of management organization showing one division within a company. Complete any missing words. If you have problems, look at the box below.

Area Company Department Director Executive Finance Human Junior Manager Middle Officers Teams

- B Choose the correct words in italics.
- 1 The organization model opposite is a *flat/hierarchical* structure.
- 2 The model shows a traditional structure/an innovative structure.
- 3 The model shows a *matrix/functional* structure.
- 4 It is probably a services/manufacturing company.
- 5 It is typical of a small or medium-sized enterprise (SME)/large enterprise.
- 6 The business is probably simple/complex.

A matrix structure is a management structure that is in part based on hierarchy but also based on project management, so special teams are created for specific tasks. In these project teams the structure is often much less hierarchical. A matrix structure involves teams with varying membership. A matrix structure is most common in small or medium-sized organizations (SMEs).

48 Information and data handling

Information helps managers reduce risk in decision-making. In the computer-age, information systems have been revolutionized. Match words on the left with words on the right to make phrases.

1	information —	interchange
2	data	user
3	artificial	technology
4	electronic funds	processing
5	electronic data	intelligence
6	information system	transfer
7	end	security

Complete the crossword. All the terms are used in data handling.

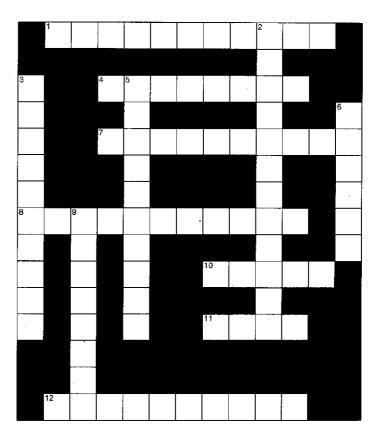

Across

ACI	
1	Computers help users to exchange (11)
4	Passwords protect
7	changes fast. (10)
8	Another word for transfer. (11)
10	Financial resources or money. (5)
11	A person working at a computer terminal is an end
	(4)
12	Using a computer to work with facts and figures: data
	(10)

Down

- 2 Robots use an artificial form of this. (12)
- 3 Computers make use of ______ intelligence. (10)

- 6 A computer _____ consists of hardware and software. (6)
- 9 Moving data from computer to computer. (8)

The word data is usually used in singular form, i.e. the data is ... rather than the data are... The word information is uncountable and is therefore used with a singular verb, i.e. the information is ...

Operations management

'Operations management is a specialized field of management associated with the conversion or transformation of resources into products and services.'

(Black and Porter, 2000)

Choose the correct explanation a) or b) for each of the aspects of operations management (1-15).

- 1 Logistics
- Another term for operations management.
- Computer studies of design systems.
- Facility layout
- a) Organization of departments.
- b) Position of things and people in a work space or factory.
- Facility location
- a) Geographical position of a work place.
- b) Place where the staff eat and relax.
- Production line layout
- a) Organization of staff in a factory.
- b) Position of machinery and people in a factory.
- Capacity planning
- a) Process of deciding how much a work place should produce.
- b) Deciding when to operate at 100% production level.
- Design capacity
- a) Ideal production level.
- b) Maximum possible level of output.
- Effective capacity
- a) The percentage of design capacity a facility should operate at.
- b) The percentage of capacity required to make a profit.
- Materials requirement planning (MRP)
- a) Purchasing materials in the planning stage of a project.
- b) Computer system to work out what is needed from suppliers, how much is needed and when.

- Productivity
- a) Measurement of output in relation to investment (input).
- b) Total volume of production in one year.
- 10 Flowchart
- a) Process designed to improve quality control.
- b) Diagram showing the stages in a process.
- Bench-marking
- a) System of calculating the number of staff required for a project.
- b) Using the high standards of competitor organizations as a comparison to improve quality.
- **Just-in-time** systems
- a) Way to improve punctuality among workers by paying them more.
- b) Control system to ensure that materials are received and deliveries made at exactly the right moment to eliminate storage and waste in production processes.
- Computerintegrated manufacturing (CIM)
- a) Integration of information systems and equipment in manufacturing to ensure quality products.
- b) Using computers to design world-class products.
- Computer-aided design (CAD)
- a) Computer software to assist in designing products, making small changes and product testing.
- b) Computer design centre for advertising new high-tech products.
- 15 Flexible manufacturing system (FMS)
- Total automation of a production facility by controlling everything with a computer.
- b) Matching orders to production.

В	Decide which of the above is concerned with:	
1	The culture and practices within a company or organization.	OB
2	The volume of production required before there is any profit.	
3	The boss in a large company or organization.	
4	Total automation of a production process.	
5	Working out what is required, and when, from suppliers.	

6	Ensuring there is no waste through storage of components or finished products.
7	Everything to do with personnel.
8	A motif for ensuring quality in everything the company does.
9	A management approach based on goal-setting, monitoring results and making necessary changes.
10	A specialist firm that created a tool to help analyse the success of individual products and product areas.
11	Everything to do with hardware and software.
12	Businesses employing fewer than 200 people.
13	A method of analysing the profitability of a company or activity.
14	An individual cost centre in terms of its contribution to the wider company activities, perhaps based around one product or group of related products.
15	A combination of tools, both in software and in other forms, to help managers in decision-making.
16	A key management function described by Peters and Waterman (1982) which involves going around and looking, listening and thinking about what is going on.
17	A tool for planning marketing that involves examining factors inside and outside the business or organization.
18	Computer software used in manufacturing industries to help product design.
19	Computer software to help with operations management in manufacturing.
20	A management approach based on quality in all aspects of company activity from sourcing, dealing with suppliers, treatment of employees, relations with customers, product design, manufacture and delivery, after-sales service and relations with the community.
O	Notice the propunciation of the names of the following letters (vowels):

- A /eɪ/ as in pay
- E /l:/ as in me
- /aɪ/ as in my
- O /əʊ/ as in owe - U. /ju:/ as in you

53 Financial control

NEW 5000-ROOM HOTEL OPENS

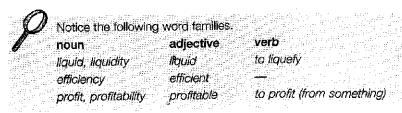

Company Chairman Fred Hopeful says:

With the current high currency valuation, the decline in tourism and rocketing oil prices, and the general economic decline, we expect to break even by about 2093.

Financial control depends on doing the right thing at the right time. Financial control also depends on analysis of various key indicators. Match the words in the box to the correct definition (1-7).

efficiency leverage budgetary control break-even point return on investment (ROI) profitability liquidity

- profitability Ratio of cost to benefit. ___
- Total income ÷ total investment = measure of profitability.
- Measure of how well a business can meet its short-term cash needs.
- Ratio of total debt to total assets.
- Ratio of amount of sales to total cost.
- Volume of sales needed to cover costs and begin to produce profit.
- System to ensure that financial targets are met.

Research and Development (R&D)

It is very important to carry out research before entering a new market, or developing new products. Choose the correct definitions for each term. In some cases, more than one definition is correct.

- Marketing research
- (a) Studies to find information that will inform marketing policy.
- Studies of consumers and customers.
- Research to find out where to sell products.
- Research
- a) Studies to find out what a company should do.
- b) The same as Research and Development.
- c) A report on research.
- Development
- a) Increased sales for a product.
- b) Selling into export markets.
- c) Work on creating a product for a target market.
- Primary research
- a) The first research a company does on a particular problem.
- b) Original research carried out by a company.
- c) Information sold by specialist agencies.
- Desk research
- a) Research which is based on published material, internet, etc.
- b) Studies into the cost of office equipment.
- Study of a new market or location without actually visiting.

- Secondary research
- a) Research that is out of date.
- b) Studies which are available to the public from government or specialist agencies, perhaps free, perhaps at a cost.
- c) Poor-quality research.
- Field research
- a) This is also known as fieldwork.
- b) Physical activity of visiting a location to find out information through personto-person interviews.
- c) Reading published material.
- Market research
- a) Studies to find out about consumers.
- b) Studies to find out strengths and weaknesses of products.
- c) Studies to find out what consumers think of different companies.

Development is not the same as research, although the terms are often used together in the phrase research and development (R&D). Research takes place before a product is made and launched. In this phase research coincides with development. Later, further research may indicate changes to an established successful product. In this case, the product may be developed over many years, with innovations to keep up to date with technical improvements and changing customer needs.

55 International organizations

Α	What do	o these abbreviations stand for?		
1	NAFTA	North American Free Trade Agreement		
2	OPEC			
3	EU

3	CNN			
4	NEC			
5	JAL			

Property

56 International marketing

Companies which want to expand into international markets need to consider many factors. Match each of the factors (1–12) to an appropriate explanation (a–1).

Factors for consideration Meaning

- 1 Location and distance
- 2 Political context
- 3 Labour costs
- 4 Infrastructure
- 5 Distribution channels
- 6 Labour factors
- 7 Economic environment
- 8 Business culture
- 9 National culture
- 10 Legislative environment
- 11 Socio-cultural factors
- 12 Fixed costs

- Skills, training and flexibility of workforce.
- b Transportation, roads, telecommunications, public services.
- c Investment needed for land, property, energy (light, heating, fuel).
- d Typical business practices, security, commercial expectations.
- e Way of life, public and private differences in language, religion, values and expectations.
- f Cost of living, inflation, interest rates, taxes, growth, financial stability.
- g. Stability, system of government, democracy, human rights.
- h Salaries and wages for local staff.
- i Geographical position in relation to home base.
- Birth rate, life expectancy, literacy, average level of education.
- k Systems for selling goods and services.
- Laws, trade regulations, membership of international groups.
- Companies enter international markets to increase their turnover and profits. Large multinational companies from developed countries may locate operations in developing countries because labour is cheaper.
 They may also set up in other developed countries because they want to be closer to new markets and to reduce distribution costs.
